

MANDATORY WATER RESTRICTIONS

As expected, the extended period of hot and dry weather has resulted in a significant increase in water demand in Woodstock and there is no relief predicted for the next seven days in the extended weather forecast from either the heat or the drought.

Currently Woodstock is able to meet this demand and our water supply and distribution systems are performing well. The six water supply wells and the treatment capacity have been able to keep with this increased demand to date. However, the increased demand over an extended period of time along with the weather forecast of extended heat and drought are a concern and it is important that we move to address this condition before the water supply becomes critical. Woodstock does not have endless supply of water.

As a result, the City of Woodstock has implemented the following mandatory water restrictions effective Tuesday, July 3:

Even numbered addresses may use outside water on even calendar days between the hours of 6:00 pm and 9:00 am. Odd numbered addresses may use outside water on odd calendar days between the hours of 6:00 pm and 9:00 am.
